

DANIEL PETER SIMPSON

PERSONAL DETAILS

Office	Menzies Building Monash University Clayton Campus	Email	dan.simpson@monash.edu
		Website	https://dpsimpson.github.io
		Citizenship	Australian

SKILLS AND TOOLS

Statistical modelling; computational statistics; Bayesian modelling; model checking and comparison; complex multilevel and mixed effects models; modelling non-representative and messy data; survey modelling; fast approximate Bayesian inference algorithms; building new statistical methods and reproducible statistical workflows for complex data. Advanced R; Intermediate Python; Basic C++.

EMPLOYMENT HISTORY

Professor of Statistics

Director of Analytics Engagement

Department of Econometrics and Business Statistics, Monash University, Melbourne May 2021 – Present

- Conduct novel, world-leading research, create innovative and effective large courses in statistics and analytic, supervise honours (masters in UK/US) and PhD students.
- Running the Masters of Business Analytics internship program.
- Developing faculty-level guidelines for promotion (and associated minimum standards) around academic impact activities (The second faculty in Australia to include this in our promotion criteria). My role has been to work on the standards in general, but to especially focus on open source software and large group collaboration activities.
- Mentoring faculty through the new impact promotions criteria.
- Driving and supporting industrial and governmental engagement within the department.

Associate Professor of Statistics (2020–2021)

Associate Chair for Research (2019–2020)

Assistant Professor (2017–2020)

Department of Statistical Sciences, University of Toronto

Jul 2017 – Apr 2021

- Canadian Research Chair in Bayesian Spatial Modelling (2018-2022)
- Lead the redevelopment of the taught portion of PhD program. This involved completely redesigning the comprehensive/qualifying exam structure to better reflect the diversity of our department's research portfolio and shepherding those changes through the department and faculty graduate committees.
- Chair of four faculty search committees; member of six other faculty search committees.
- Collate and distribute information about grants; mentor junior faculty and assist with their grant writing; contribute to the strategic planning in the Department.

Reader in Statistics

(Lecturer (Assistant Professor) in Statistics until May 2016)

Department of Mathematical Sciences, University of Bath

Aug 2015 – Jun 2017

- Placement Tutor (2016–2017). Responsible for the year long industrial placement students (109 in 2016/17) in our degree programs.
- Equality and Diversity officer (2016–2017)
- Member of the Athena SWAN Department Self Assessment Team. This committee put together successful bid for a Bronze Athena SWAN award. (2015–2016)

CRiSM Fellow

Oct 2014 - Jul 2015

Department of Statistics, University of Warwick

Topic: *Spatial and computational statistics with Markovian models*

Research Scientist

Aug 2012 - Sept 2014

Department of Mathematics, Norwegian University of Science and Technology, Norway

Topic: *Building better Bayesian methodology*

Postdoctoral Fellow

Jan 2012 - Jul 2012

Department of Biological and Environmental Sciences, University of Helsinki, Helsinki

Topic: *Spatial models in ecology*

Postdoctoral Fellow

Jan 2010 - Dec 2011

Department of Mathematics, Norwegian University of Science and Technology, Norway

Topic: *Computationally efficient modelling of spatial Gaussian processes***Postdoctoral Fellow**

2009

Department of Mathematics and Mathematical Statistics, Umeå University, Sweden

Topic: *Numerical solution of non-local partial differential equations arising in mathematical ecology***EDUCATION****Doctor of Philosophy**

2006–2009

Queensland University of Technology, Brisbane, Queensland, Australia

Title: *Krylov subspace methods for approximating functions of symmetric positive definite matrices with applications to applied statistics and models of anomalous diffusion.*

Supervisors: Ian Turner, Tony Pettitt

Bachelor of Applied Science (Mathematics – Honours 1A (top level))

Graduated 2005

Queensland University of Technology, Brisbane, Queensland, Australia

Bachelor of Applied Science (Mathematics)

Graduated 2005

Queensland University of Technology, Brisbane, Queensland, Australia

OTHER INFORMATION**Open source software:**

- Developer of the Stan probabilistic programming language (<http://mc-stan.org/>). Currently focussing on Laplace approximations and sparse matrix support. (2018–Present).
- Stan Governing Board (2018–2019, Founding member). Previously member of Stan’s NUMFocus leadership body (2017–2018).
- Developer/Maintainer of the R-INLA software package (<http://r-inla.org/>, with Håvard Rue, Finn Lindgren, Andrea Riebler, and Elias Krainski) (2010–2017) and contributor to the INLABru R package (2018).

Training and mentorship:

- Five complete and one current PhD students. External examiner for five PhD theses.
- 29 short courses across 12 countries covering spatial statistics, inverse problems, statistical ecology, Stan, INLA, and data science.

Speaking

- 23 invited conference and workshop talks and 44 seminars across the world.

Writing

- Elias T. Krainski, Virgilio Gómez-Rubio, Haakon Bakka, Amanda Lenzi, Daniela Castro-Camilo, Daniel Simpson, Finn Lindgren and Håvard Rue. (2019) *Advanced Spatial Modeling with Stochastic Partial Differential Equations Using R and INLA*. CRC/Taylor and Francis Group. 2019. Online Version: <https://becarioprecario.bitbucket.io/spde-gitbook/>
- Two books in preparation
 - *Advanced Regression and Multilevel Models*. A revision and extension of the second half of Gelman and Hill (2006). With Andrew Gelman, Jennifer Hill, Aki Vehtari, Jonah Gabry, and Ben Goodrich. *Under Contract with Cambridge University Press. Expected Mid 2023.*
 - *Bayesian Workflow with Stan*. With Andrew Gelman, Bob Carpenter, Jonah Gabry, Mitzi Morris, Advait Rajagopal, Aki Vehtari, Lauren Kennedy, and Rob Trangucci. *Under contract with CRC Press/ Taylor & Francis Group. Expected Early 2023.*
- 38 published articles in statistics, numerical analysis, and mathematical biology journals, including 4 discussion papers (Bayesian Analysis; Journal of the Royal Statistical Society, Series A; Statistical Science); 3 articles in proceedings of machine learning conferences (AISTATS, ICML, and NeurIPS); 2 long published discussions; and 7 submitted papers.

TALKS

Short Courses

(29 courses from 2011–Present)

With great power comes great responsibility: Stan for modern ecological modelling International Statistical Ecology Conference, June 2020. (1 day with Andrew MacDonald)

Course summary: Contemporary ecological models are growing more complex, capturing not only ecological processes but also other sources of variation, such as sampling noise and measurement error. At the same time, ecological data is growing not only more available, but also more highly detailed. How can we create models that capture all this complexity, while confronting the unavoidable spectre of model misspecification? It is useful to turn to specialized programming languages like Stan, which aims to be a language for specifying probabilistic models.

Stan allows users to specify and infer complex, bespoke, statistical models that are built to appropriately represent the data and process at hand. While this extra power allows scientists to get the most out of their data, we must keep in mind the mantra of Spiderman: "With great power comes great responsibility".

In this course we will cover three main topics: Building bespoke models for ecological data in Stan, including appropriate prior modelling and model checking; Inferring models using the Stan language; and Post-inference model checking, model criticism, and model selection.

Short courses on INLA and stochastic partial differential equations

Course summary: This course covers the basic aspects of building spatial models with the R-INLA software package. Depending on the audience, the course covered the basics of spatial modelling; the basics of Bayesian modelling; the INLA approximation; methods for specifying prior distributions; using the Markov property to speed up computation; random walks and splines; Gaussian models on discrete spaces (lattice and non-lattice data); continuous Gaussian random fields; modelling with stochastic partial differential equations; log-Gaussian Cox processes for point pattern data; joint modelling and spatial error-in-covariates models; and spatiotemporal modelling.

Courses (1 day unless otherwise noted): Oxford University Big Data Institute, Oxford, 2017 (1.5 days); BUC3, University of Bath, 2016 (1/2 day); University of Washington, Seattle, US, 2016; BUC2, UNAM, Mexico City, Mexico, 2016 (2 days); Queensland University of Technology, Brisbane, Australia, 2015 (3 days); Australian Institute of Marine Science, Townsville, Australia (3 days); Imperial College, London, UK, 2015 (2 days); University of St Andrews, UK, 2014 (3 days. Targeted at ecologists. With Janine Illian and Sigrunn Sørbye); University of Bergamo, Italy, 2013 (2 days); University of Santa Cruz, Colorado State University, University of Minnesota, Duke University, USA, 2013 (4 hours, spatial statistics); Medical University of South Carolina, USA, 2013 (2 days); Swiss Tropical and Public Health Institute, Switzerland, 2013 (2 days); University of Girona, Spain, 2013; Queensland University of Technology, Australia, 2012; University of Western Ontario, London, Canada, 2012; Dalhousie University, Halifax, Canada, 2012 (2 days); Winter Course in Spatial Statistics, Orsa Grönklitt, Sweden, 2012; Athens University of Economics and Business, 2012; Norwegian Computing Centre, Oslo, 2011; Aalborg University, 2011; 16th Norwegian Statistical Conference, Røros, 2011 (with Håvard Rue); University of Helsinki, 2011 (4 hours).

Short course on statistics and data science National University of Mongolia, Mongolia 2016. (4 days, with Gavin Shaddick)

Course summary: This course covered the basics of using R to model environmental data. The course began with data summaries and hypothesis testing, and concluded with modelling environmental time series.

Short course on finite dimensional models in spatial statistics, Aalborg University, Denmark, 2014. (3 days, with Finn Lindgren)

Course summary: In this course, we covered the details of the stochastic partial differential equation approximation to Matérn Gaussian random fields. The course included an introduction to Gaussian random fields, spectral theory, and the spatial Markov property. It also included more advanced topics dealing with the computational aspects of finite element approximation to the random fields, as well as the approximation properties for these finite dimensional random fields.

Short course on Bayesian Inverse Problems 94th European Study Group with Industry, Søderborg, Denmark, 2013. (1 day)

Course Summary: This course covered the basics of the theoretical and computational aspects of Bayesian inverse problems with Gaussian random field priors. The course covered the formulation of these problems, the basics of Gaussian random field priors, and an introduction to MCMC on infinite-dimensional spaces.

Invited conference and workshop talks

(22 from 2010–Present)

1. MARS 2021 (Machine Learning and Artificial Intelligence). Remote. June 2021. (Keynote)
2. The 12th International Conference on Monte Carlo Methods and Applications, Sydney, July 2019. (25 minutes, invited session)
3. Royal Statistical Society Meeting, Read Paper session. 2018. (30 minutes, Keynote session)
4. StanCon Helsinki. Keynote Speaker, August 2018. (1 hour)
5. Workshop on Causal adjustment in the presence of spatial dependence. Centre de Recherches Mathématiques. Montreal. June, 2018. Invited Speaker (1 hour)
6. Invited minitutorial, SIAM Conference on Uncertainty Quantification, Anaheim, April 16-19, 2018. The first part of the two hour minitutorial was presented by Finn Lindgren. (My portion: 1 hour)
7. Workshop on spatial point processes, UQAM, Montreal, Canada, 2017. (50 minutes).
8. Second Autumn meeting on Latent Gaussian models, Trondheim, Norway, 2017. (45 minutes)
9. Stan for Pharmacometrics Day. Faculty of Medicine, University of Paris 7 Diderot, 2016. (30 minutes)
10. ISBA 2016 World Meeting. Invited talk in the Objective Bayes Session. (30 minutes)
11. Bath-RAL Numerical Analysis Day. January 2016. (1 hour)
12. Never mind the Big Data, here's the Big Models. 1 Day Meeting, University of Warwick, December 2015. (1 hour)
13. Autumn meeting on latent Gaussian models 2015, Trondheim, 2015 (1 hour)
14. 11th International Workshop on Objective Bayes Methodology, Valencia, 2015 (Invited Discus-sant)
15. Workshop on Complex Spatio-temporal Data Structures: Methods and applications, Fields In-stitute, Toronto, 2015 (1 hour).
16. Spatial Statistics and Uncertainty Quantification on Supercomputers, University of Bath, May 2014 (45 minutes).
17. EQUIP Brainstorm, University of Warwick, May 2014 (45 minutes).
18. Advances in Scalable Bayesian Computation, Banff, Canada, March 2014 (1 hour—Withdrew).
19. Southern Uncertainty Quantification 2013, Dunedin, NZ, 2013 (1 hour).
20. 24th Nordic conference in mathematical statistics, Umeå, 2012 (30 minutes).
21. Two-day meeting of the Danish Society for Theoretical Statistics, Aalborg, 2011 (1 hour).
22. 58th World Statistics Congress of the International Statistics Institute, Dublin, August 2011 (30 minutes).
23. 28th European Meeting of Statisticians, University of Piraeus, 2010 (30 minutes).

2021:

- Department of Statistics, University of California, Santa Cruz.

2020:

- Department of Econometrics and Business Statistics, Monash University
- Center for Computational Mathematics, Flatiron Institute, New York.

2019:

- MIT Distinguished Seminar Series in Computational Science and Engineering. (With a separate seminar for graduate students)
- Department of Econometrics and Business Statistics, Monash University.
- Department of Computer Science, Monash University.
- School of Physics and Astronomy, Monash University.
- Statistics research group in the Research School of Finance, Actuarial Studies and Statistics (RS-FAS), Australian National University.
- School of Mathematics and Applied Statistics, University of Wollongong.
- School of Mathematics and Statistics, University of Sydney.
- School of Mathematics and Statistics, University of New South Wales.
- School of Mathematical and Physical Sciences, University of Technology, Sydney.
- Department of Statistics, Columbia University.

2017–2018:

- Department of Statistics: Indiana University Bloomington. (2018)
- Department of Statistics, McGill University. (2017)
- School of Mathematics Edinburgh University. (2017)
- Department of Computer Science, Aalto University, Finland. (2017)
- Department of Mathematical Sciences, University of Exeter (2017)
- Department of Statistical Sciences, University of Toronto (2017)
- Department of Biostatistics, University of Washington (2017)

2016 and Before

- School of Mathematics, University of Bristol (2016)
- School of Mathematics, Statistics and Physics, University of Newcastle (2016)
- Department of Mathematics, Brunel University London (2016)
- Department of Statistics, University of Warwick (2015)
- Department of Mathematics, Chalmers University of Technology (2015)
- Department of Statistics, University of Oxford (2015)
- School of Mathematical Sciences, Queensland University of Technology (2009, 2010, 2014)
- Department of Mathematical Sciences, University of Bath (2014)
- Department of Statistics, University of Oxford (2014)
- Department of Mathematics, University of Iceland (2014)
- Biostatistics Department, University of Zurich (2013)
- Department of Statistics, University College London (2013)
- Department of Mathematics and Statistics, University of Jyväskylä (2012)
- Department of Computer Science, Aalto University (2012)
- SINTEF (A Norwegian state research company), Trondheim (2011)
- Department of Mathematics, University of St Andrews (2011)
- Department of Mathematics, Norwegian University of Science and Technology (2007, 2010, 2013)
- Department of Mathematics Umeå University (2009)
- International Institute for Applied Systems Analysis (IIASA) (2009)
- Department of Mathematics, University of Lund (2007).

SUPERVISION

- Alex Cooper, *Adventures in cross validation and model misspecification*. May 2020–Present. Monash University.
- Yuxiang (Alex) Gao, *Exploiting structured random effects in complex models*. July 2019–2022 (Submitted). University of Toronto. PhD.
- Elias Krainski. *Statistical Analysis of Space-time Data: New Models and Applications* 2013–2018. NTNU. (With Håvard Rue. Currently a postdoctoral researcher at KAUST and an adjunct professor at the Federal University of Paraná, Brazil.)
- Haakon Bakka. *Modeling Spatial Dependencies using Barriers and Different Terrains*. 2013–2017. NTNU. (With Håvard Rue and Janine Illian. Currently a postdoctoral researcher at KAUST.)
- Geir-Arne Fuglstad. *Modelling spatial non-stationarity*. 2012–2015. NTNU. (With Finn Lindgren and Håvard Rue. Currently an Associate Professor at NTNU.)
- Xiangping Hu. *Multivariate Gaussian random fields: The stochastic partial differential equation approach*. 2010–2013. NTNU. (Joint with Dr Finn Lindgren. Formally supervised by Prof. Håvard Rue. Currently holds a permanent researcher position in industrial ecology at NTNU)

TEACHING

- ETC2420 Statistical Thinking. Monash University, 2021. 300 Students. Remote.
- STA3000 Advanced Theory of Statistics II (PhD course). University of Toronto, 2021. 11 students. Remote.
- STA314 Statistical Methods for Machine Learning 1. University of Toronto, 2020. 250 Students. Remote.
- STA365 Applied Bayesian Statistics. University of Toronto, 2020-2021. 113 students (2020), 80 students (2021). (New course 2020)
- STA465 Theory and Methods of Complex Spatial Data. University of Toronto, 2019 (29 students), 2020 (currently 27 students enrolled). 29 Students.(New course 2019)
- STA314 Statistical Methods for Machine Learning I. University of Toronto, 2018, 2020. 189 Students. (New course 2018)
- STA4514H Modelling and Analysis of Spatially Correlated Data. University of Toronto, 2018. 6 Students. Half-semester PhD Course. (New Course)
- Lecturer and course coordinator for a level 3 unit in Operations Research at the University of Bath. 141 students. 2016.
- Lecturer and course coordinator for a level 4 unit in Multivariate Data Analysis at the University of Bath. This unit covered dimension reduction, clustering, classification, and support vector machines. For this course I re-wrote all of the resources for the course, including lecture notes. 31 students. 2016.
- PhD course in Probability Theory, NTNU, 2010. Eight Students.
- First year course (accelerated over summer semester) that was equivalent to high school mathematics, QUT, 2008. 28 students.

GRANTS AND FUNDING

Approx. \$950,000 CAD as PI. (~\$1,100,000 CAD total)

Monica Alexander (PI), **Daniel Simpson (PI)**, Modelling global cause-specific maternal mortality 2019–2020

An initial contract from the World Health Organization to provide reliable estimates of the distribution of causes of maternal mortality in each country across the world \$150,000 (USD).

Daniel Simpson, Canadian Research Chair in Bayesian Spatial Modelling 2018-2022

The Canada Research Chairs Program is a Canadian TriCouncil program designed to attract and retain a diverse cadre of world-class researchers, to reinforce academic research and training excellence in Canadian postsecondary institutions. This grant provides salary and research support for my research program. \$600,000 (CAD)

Daniel Simpson, Towards useable models for complex spatial data 2018-2022

This NSERC Discover program grant focusses on constructing scalable workflows for modelling complex spatial data. \$115,000 (CAD)

Daniel Simpson (CI), Efficiently modelling non-stationarity in ecological spatial models. 2016-2017
This project investigated the use of computationally efficient non-stationary spatial models in species distribution mapping. This feasibility study, funded through the EPSRC network SECURE, consisted of a workshop and two meetings. £4000

Daniel Simpson (CI + PI), Network Equilibrium- Advanced Planning Tool. 2016
Two month consultancy contract with Western Power Distribution (working as a subcontractor of TNEI) modelling power demand over the electricity grid and how it is affected by weather. £50,000 (PI: Gavin Shaddick) + £16,532 (PI: Daniel Simpson)

M.R. Nelson, K.J. Heymer, B.S. Brook, J.R. King, D.G. Mallet, **D.P. Simpson (CI)**, R.G. Rank, VPH Exemplar project EP10 2011–2012
Funding for a one year postdoctoral research position focused on developing an environment for the mathematical and computational modelling of sexually transmitted infections. The funded project is one component of the “Virtual Physiological Human – Network of Excellence”. Total budget: €51,087.
